PROFESSIONAL SUMMARY

Full-Stack Engineer with 8+ years of professional experience delivering production-ready applications across B2B SaaS, IaaS infrastructure, and real-time systems. Engineering career began in 2011 within the FinTech sector, establishing a strong foundation in C#, .NET, object-oriented design, and relational databases. Since relocating to Austria and re-entering the tech landscape in 2018, contributed to over 8 diverse software projects, including full-stack feature ownership at RockLogic since 2022, specializing in TypeScript and NestJS microservices. Recent hands-on work on .NET Core and WPF desktop applications has reinforced a clear focus on returning to the C#.NET ecosystem, bringing dual-stack expertise, financial domain understanding, and a strong backend engineering mindset to roles within the Austrian tech sector.

PROFESSIONAL EXPERIENCES

RockLogic GmbH - Oct 2025 – Mar 2026 (6 months) | Vienna, Austria

Full-Stack Developer

- Accelerated development velocity by integrating Claude Code and Context7 into daily workflows; authored custom project rules to enforce Clean Architecture boundaries, leveraged LLMs for complex system brainstorming, and engineered comprehensive AI-driven unit and integration test-suites to maintain high code coverage.
- Developed a WPF Desktop Application extending the private banking back-office tool; implemented Parallel UI Migration by building new features in WPF while actively refactoring core modules into a web-based Angular frontend.
- Wrote comprehensive technical documentation for internal ASP.NET Core reporting modules, covering service layer design, API contracts, and data-flow diagrams for cross-team handover.
- Optimized end-to-end API performance, reducing response latency from 850ms to 120ms for back-office internal tooling and measurably improving daily stakeholder workflows.
- Built a B2B analytics platform for Ethereum infrastructure monitoring using Next.js, NestJS, and PostgreSQL, serving 10+ enterprise clients with end-to-end feature ownership.
- Designed scalable NestJS microservices integrating Grafana APIs for automated provisioning of 30+ dashboards, including full-stack authentication and data visualization in TypeScript.
- Built an internal reporting panel for 8+ non-technical back-office stakeholders, substantially reducing report generation time.
- Implemented CI/CD pipelines using Docker and GitHub Actions, significantly reducing deployment time.
- Refactored front-end data fetching by replacing legacy state-management workflows with React Query, reducing boilerplate code and stabilizing client-side caching.

Steruum Services FlexCo (Subsidiary of RockLogic) - Sep 2024 – Sep 2025 (1 year) | Vienna, Austria

Full-Stack Developer

- Developed a WPF Desktop Application for a private banking back-office tool, implementing core portfolio and transaction views with full data binding and MVVM architecture.
- WPF UI Performance: Implemented UI Virtualization (VirtualizingStackPanel) and asynchronous background worker threads, substantially reducing application rendering latency when handling datasets exceeding 50,000 rows.
- Concurrency Reporting: Designed and implemented advanced concurrency reports using Crystal Reports, enabling back-office teams to analyse multi-threaded transaction states in real time.
- Memory and App Stability: Resolved critical memory leaks and optimized local data structures, significantly reducing application crashes during long-running banking sessions.
- Implemented a server provisioning API pipeline using NestJS and RabbitMQ with RBAC for multi-tenant user management across 5+ tenant organizations, cutting server provisioning time from hours to minutes.
- Led frontend development of an IaaS platform including a real-time server management dashboard reflecting live VM provisioning state.
- Contributed to backend microservices using NestJS, RabbitMQ, TypeScript, and PostgreSQL in a multi-tenant architecture.
- Integrated payment gateway API and secure JWT/OAuth2 authentication flows, processing 500+ monthly transactions.

RockLogic GmbH - Jan 2022 – Aug 2024 (2 yrs 8 mos) | Vienna, Austria

Full-Stack Developer

- Led development of Stereum Launcher, a cross-platform desktop application using Vue.js, Electron, and Node.js, reaching 50,000+ active users.
- Built real-time monitoring systems with WebSocket-based architecture, tracking 100+ distributed nodes.
- Implemented dashboards for system metrics and live data visualization, measurably improving incident response time.

Freelance / Contract - Mar 2019 – Dec 2021 (2 yrs 10 mos) | Vienna, Remote

Full-Stack Developer

- Designed and implemented a RESTful Product Catalog and Shopping Basket API using Node.js for IRMALL, a Persian e-commerce platform; delivered scalable endpoints handling product listing, cart management, and order flow.
- Built an internal back-office management tool for HOMA using PHP and Laravel 8, including a full authentication system with role-based access control for internal staff management.

TastyDay - Jan 2018 – Mar 2019 (1 yr 2 mos) | Netherlands, Remote

Junior Frontend Developer

- Built responsive UI components and contributed to MVP development using JavaScript, HTML5, and CSS3; integrated REST APIs for a food-tech consumer platform.

Career Development & Relocation - 2014 – 2017 (3 years) | Vienna, Austria

- Relocated to Austria; completed intensive German language training achieving B2 level (WKO-certified); completed preparatory software courses at WIFI Vienna prior to formal enrollment.

Aspira Co. - Jan 2011 – Dec 2013 (3 years) | Tehran, Iran

Junior Software Developer (.NET)

- Developed internal financial software in C#, ASP.NET, and SQL Server for banking clients; accounting domain knowledge (BSc Accounting) enabled direct collaboration with finance stakeholders on data model design.
- Implemented transactional reporting modules using LINQ and stored procedures; applied SOLID principles, dependency injection, and OOP design patterns throughout.

TECHNICAL SKILLS

Backend & Languages C#, .NET 6/8, ASP.NET Core, TypeScript, JavaScript, NestJS, Node.js

Frontend & Desktop React, Next.js, Vue.js, Angular, WPF, Electron, MAUI

Databases & Storage PostgreSQL, MySQL, Redis, TypeORM, Prisma, Entity Framework Core

Messaging & Real-Time Apache Kafka, RabbitMQ, WebSockets, Socket.io

Cloud & Infrastructure Azure, Docker, GitHub Actions, CI/CD

Architecture & Patterns Microservices, REST APIs, CQRS, OOP, DDD, Event-Driven Design

AI & Tooling Claude Code, Context7 (Repository Context Mapping), Custom AI Rules (.claudemd / .cursorrules), Architectural Brainstorming, Agentic Workflows, RAG Pipelines

Currently Expanding Azure DevOps, Azure AI, LLM Orchestration

EDUCATION & CERTIFICATIONS

Diploma in Software Development (JavaScript) WIFI Vienna | Sep 2020 – Feb 2021

Diploma in Web Applications Development & OOP (PHP) WIFI Vienna | Jun 2021 – Dec 2021

Bachelor of Science in Accounting Tehran University | 2000 – 2005

Domain expertise in financial data models and transactional systems

Microsoft Azure Fundamentals (AZ-900) Microsoft / Coursera — Completed 2025

Microsoft Azure Developer Associate (AZ-204) In Progress — Expected Q3 2026
