About

SELF-PORTRAIT, IN CODE

I'm a **creative developer** obsessed with the seam between design and engineering — the place where motion, 3D and considered interaction make a product feel alive instead of just functional.

Most of my work lives at the intersection of **React, WebGL and shaders**. I care about performance and accessibility as much as craft; the most interesting moment of any project is finding the version that's beautiful *and* fast.

Outside of the editor I'm usually messing about with **Blender, Houdini**, or learning whatever's adjacent enough to be useful. Currently available worldwide, currently building.

Experience

WHERE I'VE SHIPPED

PRESENT
2024 — PRESENT

Senior Frontend Developer

CURRENT

STUDIO PLACEHOLDER · REMOTE

Leading interactive web projects with WebGL, React, and motion design. Building shipping-grade 3D experiences end-to-end.

REACT · THREE.JS · GLSL · GSAP · TYPESCRIPT

2024
2022 — 2024

Full-Stack Developer

PAST

TECH CO. · HYBRID

Built data-heavy dashboards and customer-facing apps. Owned design system migration and shipped 12 production features.

NEXT.JS · NODE.JS · POSTGRESQL · TAILWIND

2022
2021 — 2022

Frontend Developer

PAST

AGENCY NAME · ON-SITE

Delivered marketing sites and product prototypes for clients in fintech and healthcare. Mentored two juniors.

VUE · SASS · WEBFLOW · FIGMA

2021
2020 — 2021

Junior Web Developer

PAST

FIRST STUDIO · ON-SITE

Cut my teeth on WordPress, custom themes and performance work. First exposure to motion design and shaders.

WORDPRESS · PHP · JAVASCRIPT · CSS

// 03

Projects

6 SELECTED

Aurora Dashboard

01 / 06

WEB APP · 2025

Real-time analytics dashboard with WebGL data visualizations and multi-tenant architecture. Replaced a legacy tool used by 8k operators.

REACT · THREE.JS · NODE.JS

Flux Commerce

02 / 06

E-COMMERCE · 2024

Headless storefront with custom checkout, motion-rich product pages, and a cart that defies physics in the most pleasing way.

NEXT.JS · STRIPE · SANITY

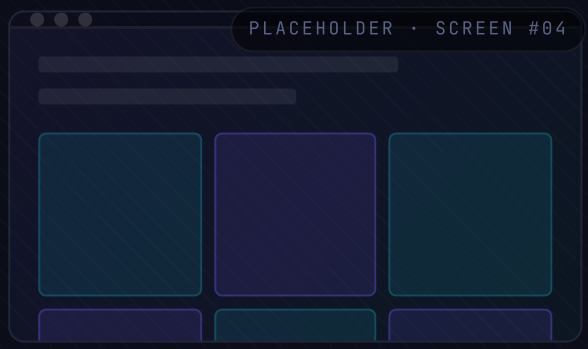
Orbital Portfolio

03 / 06

PERSONAL · 2025

Personal site reimagined as a navigable 3D space. Click an orbiting object, teleport to a scene. The thing you're looking at, basically.

THREE.JS · GLSL · GSAP



Sonar API

04 / 06

OPEN SOURCE · 2024

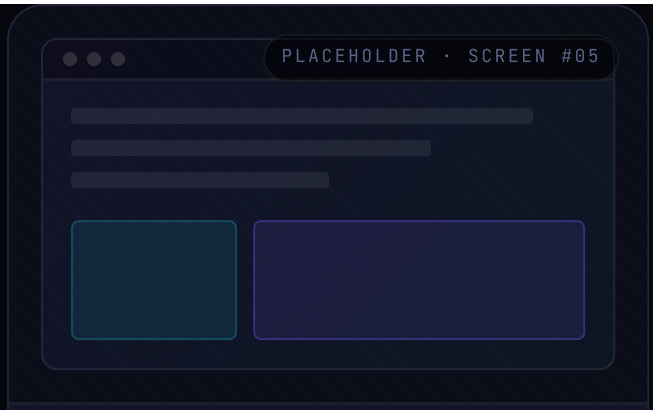
TypeScript SDK for streaming audio analysis. 3.2k stars, used by indie developers and a few studios with surprisingly large logos.

TYPESCRIPT · WEB AUDIO · WASM

Tweaks

Strength 70

VIVID — NEON SHOWREEL



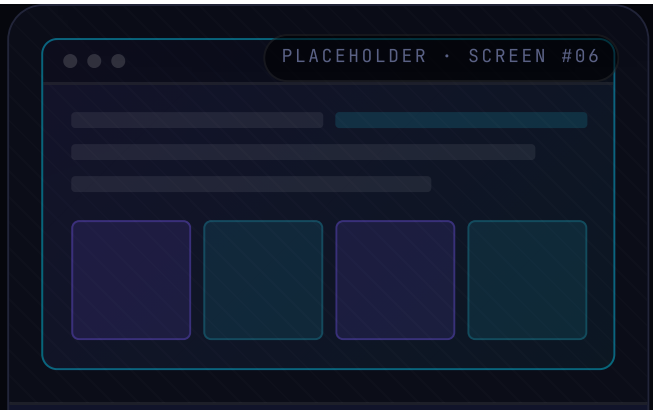
Loom Studio

05 / 06

TOOLING · 2023

Internal motion design tool that lets non-engineers compose CSS animations visually and export production-ready code.

VUE GSAP ELECTRON



Beacon Health

06 / 06

HEALTHCARE · 2023

Patient-facing intake flow that replaced a 12-page paper form. Bilingual, accessible, and quietly delightful where appropriate.

REACT I18N WCAG

Education & Learning

THEN & NOW

Education

FOUNDATIONS

University of Placeholder

2017 — 2021

B.Sc. Computer Science

Focus on graphics, HCI and software engineering. Thesis on real-time procedural texturing.

Online — Coursera & EdX

2021 — Present

Continuing Education

Specializations in WebGL, advanced React patterns, and computer graphics fundamentals.

Bruno Simon — Three.js Journey

2023

Certification

Comprehensive deep-dive into Three.js, GLSL shaders, and React Three Fiber.

Currently Learning
